# Best Paint Finish in the Industry Gets Better

Original DeltaGuard® finish  
aged two years

New Colorfast DeltaGuard  
finish aged two years

New Colorfast DeltaGuard  
finish fresh out of the box

Our DeltaGuard paint finishing system is recognized as the benchmark for outdoor lighting products. Its seven-year warranty, excellent appearance, long-lasting durability with exceptional resistance to abrasion, corrosion, ultraviolet light and impact assures years of worry-free service.

Committed to continuous improvement, Beta has raised the bar yet again with the new Colorfast DeltaGuard finish. The Colorfast process retains all aspects of the original DeltaGuard finish and offers further improved performance in durability and color retention.

Colorfast DeltaGuard proved its superiority in a Florida test environment simulating two years of use. The original DeltaGuard finish and the new Colorfast finish were tested side by side to gauge the new system's performance. The original DeltaGuard finish showed minor fading while the Colorfast housing remained virtually unchanged.

When the housing with Colorfast DeltaGuard finish aged two years was compared to a brand new housing, minimal variation was detected.

The key to the improved durability and colorfastness of the new Colorfast DeltaGuard system is its ultra-durable powder top coat. This exceptional new finish is standard on all Beta Lighting products and is available in black, bronze, white, silver, verde, and platinum bronze.
